

## PIK-01 - Scan-Locked Canonical Standard

Horizontal production reference: exact uploaded canonical scan. Do not substitute older generated print files.

The seated tiger must show: rear haunch, curled tail, front paws, lower baseline, stone arch, and lamp.

Recommended textile ratio: 3:2. Add printer bleed outside the visible border; do not crop into the border icons.

## Emblem / Relief Reference

Left: exact scan crop. Right: relief-guide derived from the scan. Both preserve full tail and legs.

## Vertical Hanging Banner Proof

Vertical proof uses the same scanned emblem. It is for hanging banners, not a replacement for the 3:2 flag.
